This is in response to Papers filed on 18 January 2007.

I. The following is an examiner's statement of reasons for allowance:

The record shows applicants make an amendment filed on 18 January 2007 to include the embodiment with respect to "wherein the toner is comprised of toner particles with pigments and charge control agent on the surface of said toner particles" and about the same in the claims.

Applicants' arguments filed on 18 January 2007 are correct that the applied reference with respect to Yamaguchi et al (5,536,612) do not disclose, teach or suggest the newly added embodiment with respect to "wherein the toner is comprised of toner particles with pigments and charge control agent on the surface of said toner particles" and about the same.

The specification of the instant application has been carefully studied. In paragraph 0026, applicants disclose that large amounts of pigment and charge control agent are located on surfaces of toner particles by an interaction of the use of an amount of a hydrophilic monomer or polymer, pigment and charge control agent. In paragraphs 0052 to 0094 applicants show that an additional use of a polar grafting agent to a hydrophilic monomer or monomer provides additional charging

value and image density. They are not disclosed, taught and or suggested in Yamaguchi et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

II. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332.

The examiner can normally be reached from 6:30 AM to 4:30 PM on Monday through Thursday and about the same time of most Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 571-272-1526.

Applicants may file a paper by (1) fax with a central facsimile receiving number 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR
